## OBJECTIVE

---

Web developer looking for an entry-level role within an organization that fosters personal growth through collaboration, trust, and mentorship.

## EDUCATION

---

**Full Stack Web Developer Bootcamp**, Integrify 2023

Built full stack projects using the MERN stack: MongoDB, Express, React (TypeScript) and Node.js.

**M.Sc. Computer Science (GPA 4.0)**, Stockholm University 2022

With a specialization in immersive technologies and the highest achievable GPA, I gained practical knowledge in areas such as: Machine Learning, Virtual Reality and the Internet of Things.

**B.Sc. Computer Science**, Stockholm University 2018

With a specialization in digital media, I gained knowledge in areas such as: Java, Processing and Human-Computer Interaction.

**Exchange Studies**, The Berlin School of Economics and Law 2017

Broadened my knowledge in areas such as: Business Administration, Marketing, Micro- and Macroeconomics.

## SKILLS

---

**Frontend** HTML, CSS, TypeScript, JavaScript, Git, React, Tailwind, Redux, Framer Motion and Figma

**Backend** Express, Node.js, Prisma, MongoDB and Python

**Soft Skills** Systematic, Self-Driven, Organized and Ambitious.

## EXPERIENCE

---

**COO & Co-Founder** Sep 2020 - May 2021  
AI Medical Technology *Stockholm*

- Worked strategically and executed tasks within R&D, regulatory compliance, clinical research, and business administration to secure € 380K seed funding for Dermalyser, an AI-powered clinical decision support.
- Recruited a board, clinical advisory, and AI developer.
- Built version 1 of the AI algorithm.

**User Researcher Intern** Jun 2020 - Sep 2020  
Spotify *Stockholm*

- Planned, scoped, and executed a joint research insights initiative together with a data scientist trying to understand how 300 million active users could be served a better experience finding and discovering new releases of the artists they love.
- The research was selected as a company-wide core piece of knowledge concerning music discovery

**User Researcher** Jan 2018 - Nov 2018  
YEAY *Berlin*

- Responsible for the end-to-end user research process involving weekly user tests, interviews, surveys, and field studies.
- Adopting my work to a fast-moving start-up culture enabled users to be let into discussions and decision-making through clear and actionable insights.

## PROJECTS

---

**Solenergiteamet** Building a full stack customer-facing web application for a company in the solar energy industry.  
Stack: React, Tailwind, Next.js - [solenergiteamet.se](https://solenergiteamet.se)
